jtimonen@protonmail.com

254-248-4758

I am an expert freelance filmmaker specializing in emotionally-driven storytelling, videos and documentaries. I have created over 30 short films during the past 3 years for churches, non-profits and schools, and have experience creating scripted content, title sequences for feature films, graphic design, music and sound editing, color grading, voice-over and much more. I also have a background in software engineering and worked for both eBay and Weber on iPhone (iOS) applications.

Weber, Inc.

Dec 2021 – Dec 2023

Senior iOS Software Engineer

- Development of Weber Connect universal iOS app which connects smart grills to iOS devices for temperature tracking, recipe guidance, graphing and more.
- Developed June Oven companion iOS app which connects to the June counter-top smart oven.
- Development using iOS technologies such as Swift, Combine, UIKit and SwiftUI.
- Created step-by-step recipe experiences with connected grills and June Oven over Bluetooth and web sockets.
- Custom graphing and data display using Core Graphics and UIKit.
- API communication with Weber services using REST, GraphQL
- Video playback and stream management for recipe wizard using AVKit.

eBay, Inc.

Oct 2014 – Dec 2021

Senior iOS Software Engineer

- iOS development of core eBay app using Swift and Objective-C.
- As part of ‘Foundations’ team, working to modularize app to move away from monolithic legacy structure.

Working to incorporate Combine and Functional programming patterns. Responsible for reviewing pull requests for any foundational code in our iOS code base.

- Contributed to major components such as the home screen, listing view, sign in, photo viewer, my ebay, selling flow, search and more.
- Filed 20+ patents on software design
- Gave iOS developer team presentations on test-driven development, Clean Code Practices, WWDC recaps, ARKit, Xcode Instruments and more.
- Worked on emerging Augmented Reality and Virtual Reality platforms such as Magic Leap, HoloLens and Oculus Go, using Unity, C#.
- Won 1st place in Hackathons in 2020, 2017, 2016, and 3rd place in 2019.
- Was sole iOS developer on eBay’s first ARKit feature called “Which Box,” which allows users to select a USPS flat rate box in augmented reality.
- Worked on several emerging AR headsets to create early prototype apps for eBay.
- Agile development using JIRA for sprints and ticket tracking.

Upper Branch Productions

2006 - 2014

Freelance Film-making & Mixed Media

- Title sequences for feature films
- Documentary short films
- Educational online video series production
